Bank Robber Has Eluded Pursuit With Skill Equaling the Daring of His Escape From Jail-Crowd of Pursuers Lost Sight of Him.

IS BELIEVED TO HAVE CROSSED RIVER IN SKIFF.

Escape Was Most Daring in Conception and Execution Ever Carried Out at St. Louis Jail-Suggested by Flag Raising.

No positive trace of William Rudolph, the Union bank robber and alleged murderer of Pinkerton Detective Schumacher, who escaped from the city jail Monday atternoon, as told in a Post-Dispatch extra. has been found since he disappeared from the view, in the railroad yards at Eleventh and Poplar streets, of the persons who saw him juinp from the jail roof.

Gov. Dockery today offered a reward of \$300 for the capture of Rudolph. Numerous reports of persons believed to be he have reached the police and they

are of the opinion that the man who crossed the Mississippi in a skiff from the foot of President street at 11:15 o'clock Monday night was he, although in the darkness on the water it was impossible to make sure. In making his escape from the jail Ru-

dolph climbed 50 feet in full view inside the jail, wriggled through a little hole kicked in a skylight, ran 150 feet along the perilous edge of a roof 35 feet above a paved courtyard in the gaze of persons on two streets, made two jumps of 20 and 15 feet each from roof to roof and dashed through the jailer's home into the street from which several persons had watched his operations. The police agree that it was the most dar-

ing escape ever made from the city jail. Carefully planned and executed at exactly the right moment, it was carried to success before the guard who saw the desperado's disappearing heels had time to give the alarm. It was an escape typical of Rudolph.

who, although not yet 21 years old, has shown himself capable of masterly planning and just as masterly execution.

Plan to Escape

Was Well Laid. The police believe the whole plot, from the starting of the fight in a far corner of the pen to the dash of Rudolph through the jailer's house, was planned step by step by the young desperado, and not a hitch in the

arrangements occurred. A minute before the fight began Rudolph had been lounging about the pen taking his usual exercise as unconcernedly as if not a thought of escape were in his head. He was not jovial, for joviality was foreign to him. He was always glum and

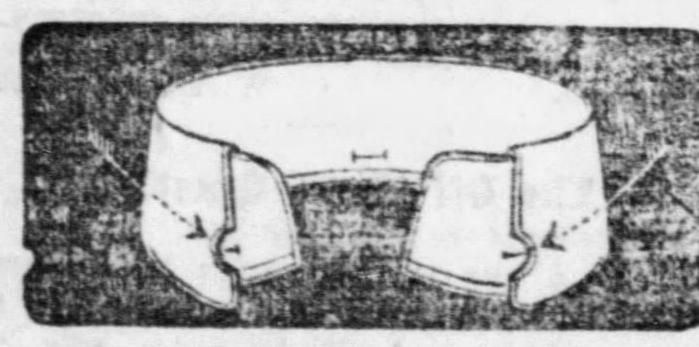

Fifty feet above his head at the extreme east end of the pen over cells 108, 109 and 110 the light shone through a skylight which no ordinary man would think of trying to reach in full view of seven men armed with rifles. Rudolph did not look toward it, and apparently was not conscious of its existence.

Suddenly shouts and curses came from the west end of the pen around a little corner from which the skylight was not in full

The prisoners started in that direction as if to see the fight, and the guards, expecting trouble, all hurried in the same direction. They did not stop to think of Rudolph in particular, as he was right in the crowd.

There was excitement and running hither and thither to stop the trouble. That was the critical moment in Rudolph's game. Escaping the notice of the guards he slipped back to the east end of the pen and dashed up two flights of iron stairs to the third tier of cells. A grating of iron bars with pointed ends formed the roof over the stairway, but it was open at one end and ! there was a small iron rod at the side serving as a bannister.

Rudolph, moving swift and still, like a decomposition of the still, like a decomposition of the still, like a decomposition of the still of the stil cat, stepped on this rod, grasped the sharp ends of the bars above the stairway and of cell 110, next the stairway on the north, column. Crouching low he glided across the roofs

The Tyfold Collar

The picture shows how the collar is cut out on each side to allow for adjusting a neck tie without springing the collar open. The collar comes close together in front, it keeps the tie in place and you don't see the cut-out part. Besides the tie is retained just over the button, which is also kept out of sight. Your summer comfort will be increased if you wear one, and you'll thank us for the style. Dealers sell them.

SIMPLICITY HAS BEEN DOMINANT NOTE IN THE LIFE OF HIS HOLINESS, LEO XIII.

This plain announcement penned by one of Napoleon's Colonels, and showing . • in its very simplicity the paternal pride and joy of the author, followed the birth • of Leo XIII at Carpineto, in the diocese of Anagni, in which was then the States .

Kansas City, July 6,-It was reported here to-night that Colonel John H, Carroll, general attorney of the Burlington system, had agreed to testify before the Grand Jury in St. Louis to-morrow. Ten days ago, it is said, Mr. Folk wrote a letter to Colonei Carroll explaining that, while he could not get service on him while he was out of the State, he hoped that the Colonel would have no objection to coming back and olding the Grand Jury in its labors. The result, it is said, was a promise that Carroll will go before the Grand Jury to-morrow morning. There is a further report that Colonel Carroll consulted Judge O. M. Spencer of St. Joseph before he agreed to appear as a witness in St. Louis, and that Judge Spencer advised Colonel Carroll to give his testimony in relation to legislative matters.
